PROFESSIONAL SUMMARY

Motivated final-year CSE student with solid programming fundamentals and practical experience gained through internships and project work. Strong problem-solver with effective communication skills and a collaborative approach to achieving team goals. Seeking an entry-level position to apply technical knowledge and grow within a dynamic organization.

SKILLS

Programming Languages: Python

Web Technologies: HTML, CSS, JavaScript

Database: SQL

Frameworks & Libraries: Django, TensorFlow, Scikit-learn, Pandas, NumPy

ML & AI: Supervised & Unsupervised Learning, Deep Learning

Cloud & Devops: AWS (EC2, S3, ECS, Lambda)

Soft Skills: Strong problem-solving ability, effective communication skills, adaptability, teamwork

EDUCATION

B.Tech, Computer Science and Engineering **2022-2026**

Aditya Engineering College, Surampalem CGPA:7.74

Board of Intermediate Education **2020-2022**

Career Point, Rajahmundry Percentage:78.8

Board of Secondary Education **2020**

Sasi Educational Institutions, Rajahmundry Percentage:99.8

INTERNSHIP EXPERIENCE

Artificial Intelligence Intern | Smart Internz **May 2024 – July 2024**

- Built machine learning and deep learning models during internship using Tensorflow and Scikit-learn.
- Performed effective data analysis, preprocessing and model optimization to improve performance and accuracy.

AWS Intern | Technical Hub **June 2024 – May 2025**

- Developed scalable cloud solutions using AWS services including Lambda, API Gateway, and DynamoDB.
- Integrated and optimized cloud services within existing systems through team collaboration.

CERTIFICATIONS

- Postman API Fundamentals Student Expert – Postman
- HTML5, JavaScript, CSS – Infosys Springboard
- AWS Academy Graduate, Cloud Foundations – AWS Academy
- Python, CSS, SQL – HackerRank

PROJECTS

Plant leaf disease detection (AI)

- Designed and implemented a CNN-based deep learning model achieving 90% accuracy in classifying 15 plant diseases using image preprocessing and data augmentation.

Yeast Quality & Yield Prediction

- Designed and developed a web-based system for yeast quality classification and yield prediction, enabling real-time monitoring to improve efficiency and reduce manufacturing losses.

Object Detection using FSD and AWS

- Built a responsive food ordering website using HTML, CSS, JavaScript implementing a fixed CCBP-style navbar for smooth navigation and designing key sections with custom CSS for structured layout.

Quickpedia Search Application

- Developed a dynamic web application using HTML, CSS, JavaScript to fetch and display Wikipedia results via API integration with keyboard-triggered interactions.
